**NAT PAPER | CONFORMANCE TO ISO 9706 | REQUIREMENTS FOR
PERMANENT PAPER INTENDED FOR DOCUMENTS**

TO WHOM IT MAY CONCERN:

This is to confirm that LEDESMA continually evaluates the specification of our NAT brand of office paper against ISO 9706 so that customers can be confident that when archived and stored under reasonable conditions, NAT A4 office paper will remain unaltered for many years.

I confirm that NAT Paper has:

1. A PH Range of 9.0 to 9.4 according to ISO 6588; *pH values of a cold water extract of the paper.*
2. An Alkali Reserve Range of 2.0 mol/kg to 2.4 mol/kg according to ISO 10716; *neutralize acid action measured by the alkali reserve.*
3. Tear Strengths of Length 378 Nm and Width 392 Nm according to ISO 1974.
4. A Kappa Number of 6 according to ISO 302; *maximum content of easily oxidized material measured by the kappa number.*

Therefore, when you choose NAT, you can be sure that you are choosing paper that has a high degree of permanence that will undergo little or no change in properties that influence readability and handling, when stored in a protective environment for long periods of time.

Sincerely.
